Ulster University

ARE YOU OR HAVE YOU BEEN INVOLVED IN OR SUPPORTED BRAIN COMPUTER INTERFACE TECHNOLOGY TRIALS? IF SO, WE WOULD LIKE TO TALK TO YOU.

Title of Study:
Brain-Computer Interface Technology Use Involving People with Disorders of Consciousness and Locked-in Syndrome: The Lived Experience of Families

The aim of this study is to explore the experience of the family during the use of Brain Computer Interface (BCI) technology on people with disorders of consciousness or locked-in syndrome. We would like to find out more about your experience of the use of BCI technology, the impact this has had.

What's involved for you?

We would like you to record a video diary of your experiences.

Are you eligible?

- Are you currently involved in, or have you been involved in a brain computer interface technology training study?
- Are you aged 18 and over?
